ITEMS OF INTEREST TO REA BORROWERS

Speedy Action Essential.. IF YOU DESIRE THESE MATERIALS

November 19, 1946

MATERIAL: Coaxial Cable for Two-Way Radio Communication Systems.

CONDITION: New - Excellent.

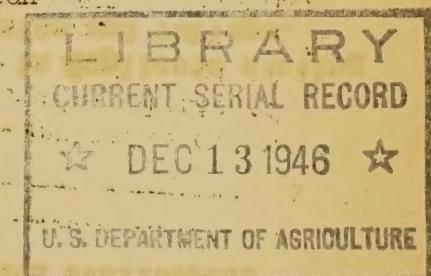

ORDER INSTRUCTIONS: Make out purchase order in duplicate to Macon Electric Co-operative, Macon, Missouri, and mail to Surplus War Property Office, Rural Electrification Administration, U. S. Department of Agriculture, Washington 25, D. C.

ITEM NO.	QUANTITY	DESCRIPTION	UNIT PRICE
1	78,340'	COAXIAL CABLE-RG-54 R/U, American Phenolic Company F.O.B: Macon, Missouri	\$.035 per ft.

NOTE: It is suggested All R.E.A. Cooperatives contemplating the installation of two-way radio communication systems, purchase at least 200 feet of this cable for maintenance and some installation work.

Due to the wire size, it is felt this cable is suitable only for RECEIVERS and NOT for TRANSMITTERS.

See other side for information about available power plants for TWO-WAY Radio Communication System.

MATERIAL: Power Plants for Two-Way Communication Facilities.

CONDITION: New and Used Good.

PRICE: Varying, as stated below.

ORDER INSTRUCTIONS: Send SWP Office your purchase order in duplicate stating
your preference as to manufacture, size and voltage.

Cooperatives contemplating the installation of two-way radio communication systems may require auxiliary gasoline driven generating plants of 3KVA to 5KVA capacity. 3KVA capacity is sufficient for all sizes of communication transmitters contemplated for use on REA systems. However, if an appreciable additional lighting load is required a 5KVA generator is recommended.

Many plants of the type required are now available through Surplus War Property. These plants are of the following manufacture: Onan, Kohler, United States Motors, O'Keefe & Merritt, Briggs & Stratton and Delco. They can be obtained in single phase single voltage 110, 115 or 120. Some units available have double voltage 110/220, 115/230 or 120/240.. Single voltage is adequate for the 3 KVA size. Double voltage is recommended on the 5 KVA size.

The price of the units vary depending on the location and District War Assets Administration Office through which they are available. On an average, units new and slightly used-good will cost approximately \$110 per KVA. Other units rated as used, useable without repairs will cost approximately \$75 per KVA.

If these units are to be purchased through normal sources, 3 KVA will cost from \$750 to \$1000. 5 KVA from \$950 to \$1200.

Note on Items 3, 4, and 5:

ENGINEERING FEATURES OF INTER SOUND FOR COOPERATIVES OFFICE

DESCRIPTION- Inter Sound has an amplifier and a group of speakers which also serve as microphones.

By pushing the talk button you can speak directly to all parties at the other stations.

One or all stations can talk and listen from every station in the system.

OPERATION- To operate simply push button and talk-release button and listen. The talk button on sub station may be locked in talk position if continuous pickup is desired at that station. Master station may talk to sub station with or without sub station button locked.

SCOPE- This system may include as many as six stations (one master and five sub units) each of which can talk to all others. Inter Sound can be used for great distances, but for distance greater than 1000 feet, consult a technician.

NOTE: All items located at San Diego, California
